PROFILE

A Creative Computer Science undergraduate with a 4.5/5.0 GPA, Technical Writer, and Front-End Developer, with a passion for building engaging digital experiences and making complex technical concepts accessible and intuitive. Proficient in architecting responsive, high-performance interfaces using **HTML5, CSS3, and JavaScript**, with an emphasis on **neurodivergent accessibility**. Seeking to expand my technical stack into modern frameworks like **React** to build more complex, scalable web applications.

EDUCATION

B.Sc. Computer Science | Dominican University, Ibadan, Nigeria

Expected Graduation: August 2026

Current GPA: 4.5/5.0

Relevant Coursework: Algorithms & Complexity, Object-Oriented Programming, Database Management Design and Implementation, System Analysis and Design, Computer Architecture and Organization, Discrete Structures, Operating Systems, Computer and Network Security, Human Computer Interaction.

Certificate: Java Programming (Course Completed) - Object Oriented Programming, Exception Handling, File Handling, Data Structures, java.desktop

TECHNICAL EXPERIENCE

IT Intern | IT PLUS, Ibadan, Nigeria *Jul-Sept 2025*

- Developed and refined client website features using front-end technologies, focusing on user interface improvements and functionality.

- Tested and troubleshooted web applications across different browsers and devices, ensuring optimal user experience.
- Documented development processes and collaborated with team members on project workflows.

IT Staff | Consumer Microfinance Bank, Abuja, Nigeria *Jul-Oct 2024*

- Applied technical problem-solving skills to support customers by translating technical and financial processes clearly
- Gained experience in organizing and managing client records and internal databases using MS Office tools.
- Assisted in basic troubleshooting and system documentation.
- Applied creativity and graphic design knowledge in designing promotional content for new services operations.

PROJECTS

Noeopad—Lightweight Online Notepad | ([Live Site](#))

- **Designed and Developed** a clean, responsive web application from concept to deployment to documentation using **HTML, CSS, and JavaScript**.
- Implemented a focus on **user experience and accessibility**, featuring a minimalist interface suitable for neurodivergent users.
- Leveraged LLMs (Gemini/ChatGPT) to **systematically test UI edge cases** and debug complex JavaScript state management.

Something Rare – Interactive Portfolio & Digital Journal | ([Live Site](#))

- Architected a narrative-driven portfolio using modern design principles and smooth interactions to showcase technical writing and web projects.
- Engineered custom interactive components, including "vintage paper" modals triggered by buttons, to deliver poetry and letters through purposeful DOM manipulation.
- Optimized layouts for various screen sizes, ensuring a seamless and immersive storytelling experience for all users.

Personal Portfolio Website | ([Live Site](#))

- **Built a custom, responsive and engaging portfolio** from scratch to showcase web development projects and technical writing samples.
- Features modern design principles, smooth interactions, and optimized layout for various screen sizes.

Technical Writing Blog | [Medium](#)

- **Authored engaging technical content** including "Learning to Code with ADHD & Dyslexia: Survival Guide for Beginners," demonstrating ability to explain complex topics with creativity and empathy to diverse readers.
- Utilized AI workflows to **structure and iterate on complex technical drafts**, ensuring that highly technical concepts (like coding with ADHD) remained empathetic and logically organized for diverse readers.

TECHNICAL SKILLS

- **Front-End Development:** HTML5, CSS3, JavaScript, JSON, API Integration, Responsive Web Design, UI/UX Principles
- **Programming & Databases:** Python, Java, SQL, SQLite, Git, GitHub, Version control
- **Technical Writing:** User Documentation, Tutorials, Technical Guides, Blog Content
- **Tools & Platforms:** Markdown, MS Office, VS Code, Git, Netlify, Figma(basic), Canva, ChatGpt, Claude Sonnet 4.5, Gemini 3
- **Professional Skills:** Creative Problem-Solving, Technical Communication, User-Focused Design, Adaptability, Research, Agile

PRODUCT DEVELOPMENT & AI WORKFLOW

- **Conceptualization & Prototyping:** Transform initial design inspiration into high-fidelity drafts using **Canva**, focusing on visual hierarchy and accessibility for neurodivergent users.
- **Core Development:** Build responsive components from scratch (**HTML/CSS/JS**), ensuring a clean and sustainable codebase before introducing automated tools.

- **AI-Augmented QA (Human-in-the-Loop):** Systematically utilize **LLMs (Gemini/ChatGPT)** to audit complex code logic, identify edge-case errors, and orchestrate API integrations that enhance product functionality.
- **Iterative Debugging & Optimization:** Leverage AI-driven insights to refine JavaScript performance and explore alternative logic structures for better user experience.
- **Final Polish & Deployment:** Conduct rigorous manual reviews of color contrast, layout fluidity, and UI consistency to ensure "pixel-perfect" production-ready results.
